## SHOT BY LAMMI

In 1996 ten teenagers met up in Boston to start the most energized Ska-Punk band the world has ever seen. 18 years later, they are still playing strong; that band is – Big D and the Kids Table. With their ‘do it yourself’ ambition, Big D recorded / manufactured their own music, printed their own merchandise and globally booked their own tours. Now in 2014, for the first time, Big D and the Kids Table is reissuing their first record ‘Shot By Lammi’ on white vinyl with bonus tracks. Big D listeners will be hungry to get this wax under a needle.

## GOOD LUCK

Big D listeners have been best described as ‘Trekkies’ – generations of devoted followers who each has a favorite album and to which each will defend that album until they are breathless. However there is one album they all agree should be handed out at birth and that album is – Good Luck. Recorded in 1997, not in 2014, for the first time on blue vinyl, with celebrated artwork and bonus tracks, Good Luck is finally here. Globally Big D Trekkies are sure to do whatever they can to get their hands on this youth driven, positive record.
