The mark that the late producer J Dilla left upon hip-hop during the 90s and early-to-mid 00s is undeniable. His work with De La Soul, Busta Rhymes, The Pharcyde, and of course Slum Village long been cemented his prominence in the annals of hip-hop history.

Of the many words one can use to describe J Dilla's legacy, one that's not used enough is prolific. Dilla made beats constantly. So new Dilla compositions are still being discovered. One of the places where those works are still being unearthed is the archives of the Ne'Astra Music Group, who proudly present here 8 Dilla tracks previously unissued on vinyl.

Dilla's legacy continues to be shared and celebrated by today's hip-hop audience – with help from the tireless efforts of Ne'Astra.
