

SUN RA DISCO 3000

DISCO 3000

THIRD PLANET

FRIENDLY GALAXY

DANCE OF THE COSMO-ALIENS

The album's one of Ra's greatest from the 70s -- recorded in Italy in 1978, and featuring some incredibly otherworldly keyboards that are some of his most enigmatic on record! Original tracks from the album include "Disco 3000", an incredible workout on synthesizer, with a tiny bit of drum machine, a little "Space Is The Place" breakdown, and all of the wild sound you'd expect from a Sun Ra album -- plus more long tracks -- the sweetly soulful "Friendly Galaxy", a great soul jazz number, and "Dance Of The Cosmo Aliens", which has spooky organ, frenetic bass, and somber percussion
