On his new album *Terror Management*, **billy woods** weaves past, present and future into a dark tableau as hilarious as it is macabre. This is a place where skeletons spill from closets, lead pours from faucets and the punchline is the whole joke. This is the sound of the police not coming, of garbage trucks in reverse, of glaciers shearing off into a black ocean. But these are also tales of perseverance, compassion and love, however quixotic. Of snatching one's humanity from the fires that rage all about us.

*Terror Management* features production from Preservation, Blockhead, Willie Green, Messiah Muzik, Small Pro, ELUCID, Child Actor, Steel Tipped Dove, Uncommon Nasa, Jeff Markey and Shape. Together they create a backdrop of seamless fragmentation perfectly suited to these times—this era of cognitive dissonance. Mach Hommy, Fielded, Pink Siifu, Akai Solo, Lauren Kelly Benson (fka L'Wren) and The Funs all make guest appearances.
