**THE SOPHOMORE LP FROM THE BREAKTHROUGH MODERN-SKA PACESETTERS** Catbite have found themselves at the forefront for the "New Tone" ska movement, and for good reason... they straddle the worlds of Traditional, Two-Tone, and Ska-Punk with ease and profficiency, drawing comparisons too everyone from RANCID to THE SKATALITES. Their newest LP "Nice One" is a genre re-defining lap through energizing, soulful, and anthemic tracks that can hold their own in any ballrom, dancehall, or punk basement. Singer Brittany Luna shines brighter than ever as she delivers 10 powerful tracks in her signature croon, tackling everything from heartbreak, to self-empowerment, to putting "creeps" in their place. Any conversation about the modern ska movement **MUST** include Catbite and this stellar sophomore release.

If nice one makes on thing clear, it's that Catbite are not just a bunch ska musicians, they're students of the genre as well. The band's sound this time around is larger, sounding like a huge ska party. What this record lacks in gloss it makes up for in really tight and impressive performances. The snappy song-writing is the biggest selling point. A great follow up record.

ANTHONY FANTANO, THE NEEDLE DROP

Catbite's self-titled record fully displayed the group's ability to write infectious melodies with huge refrains backed up by an incredibly tight rhythm section. On their second record, Nice One, the group has turned everything up a notch."

AARON EISENREICH, THE ALTERNATIVE
